1<sup>st</sup> international foresight workshop on

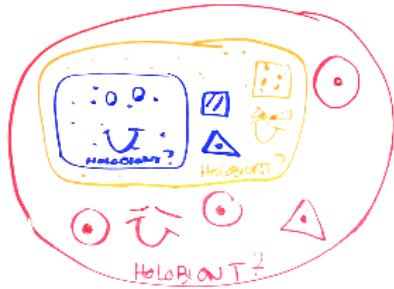

## Marine holobionts – concepts and challenges

Roscoff (France) – March 27th and 28th, 2018

EuroMarine 2019 GA

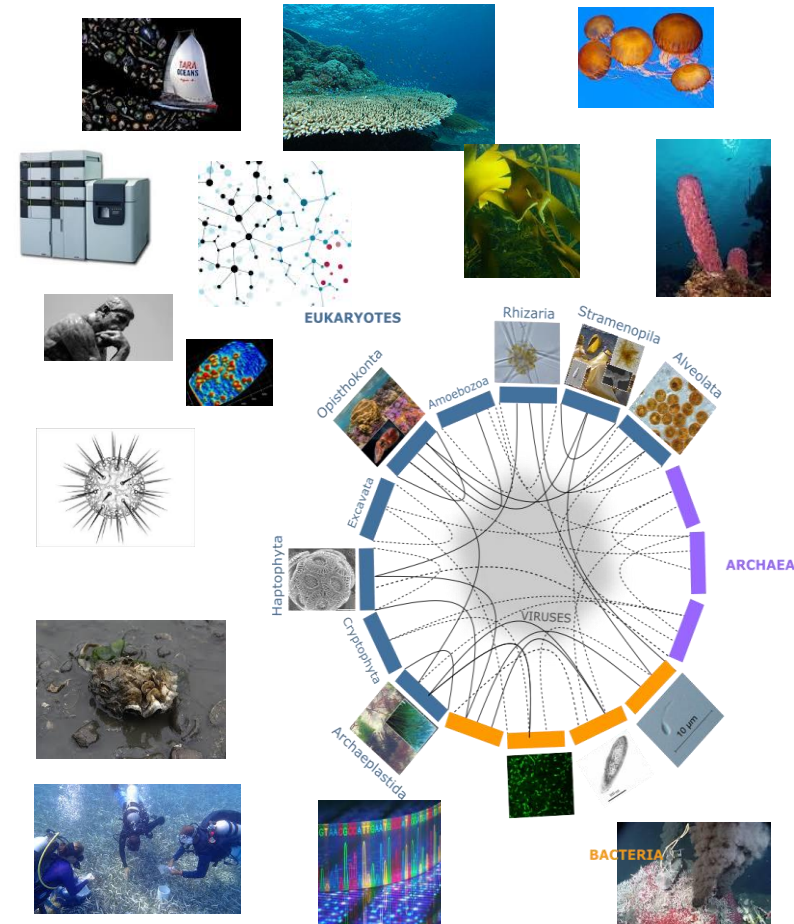

# Aims of the workshop

- **Holobionts:** an emerging and important concept in many fields of (marine) science

- Same concept is applied to similar questions but at different scales, in different models, and using different approaches; few interactions within the larger community.

- Bring together diverse group of researchers
- Outline key opportunities of the holobiont concept and common challenges to face
- Contribute to structuring a community to tackle these challenges

# The holomarine workshop in numbers

2 days

11 countries represented

31 participants

20 belonging to Euromarine member or invited institutes.

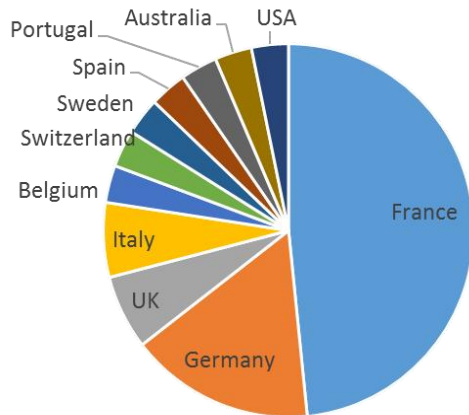

15,622 Eur global budget

100 applications

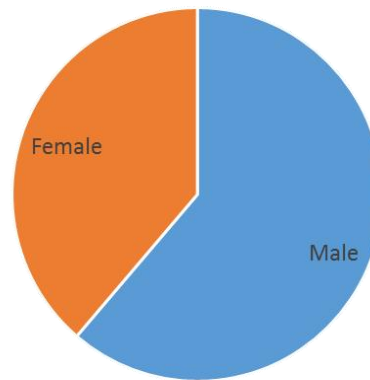

Several hundred post-its

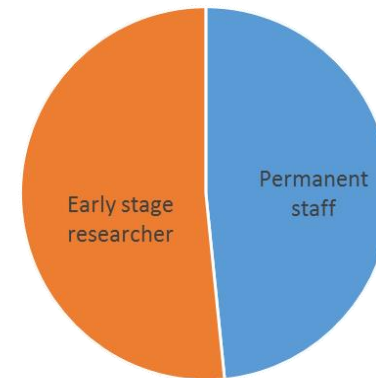

Country of origin

Gender equality

Senior vs. junior researchers
